HYDRONIC System

Hydronic systems with a full series of chillers and heat pumps for medium and large installations

PACKAGED System

Single-block air-conditioning systems for the services sector, extensive distribution and structures for medium and high crowding

PRIMARY AIR System

Fully stand-alone air renewal and purification systems for all applications (Dedicated Outdoor Air Systems)

WLHP System

Energy transfer loop-based systems for simultaneous heating and cooling requests for the services sector

TERMINAL Units and AHU

The series of terminal units and air handling units for every application

CLOSE CONTROL System

Precision control systems in technological applications

AUXILIARY Systems

Split systems, condensing units, stand-alone air conditioners, remote condensers
